WISELY TOKEN

INTRODUCTION

WISELY TOKEN, a Deflationary Reflection Token with Automated Liquidity Acquisition, can be obtained by depositing and storing them in the community wallet. How did the award come to be? Each community transaction will generate the incentive, with a matching percentage distributed to all holders. WISELY has a powerful burning and anti-whale mechanism that constantly reduces supplies.

After completing all of our objectives in a very short period of time, frame. More Cex platforms are being listed, as is the coin market capitalization. as well as coin gecko, smart contract security checks, and a variety of other services partnerships. Wisely has a bright future ahead of him.

WHAT IS WISELY TOKEN

Wisely Token contract is a combined of RFI tokenomics with the added functions: Anti-Dump Lock, Anti-Whale, Auto Boost & Hyper deflationary, with auto-liquidity generating protocol. First, the developer has minted the tokens and sent the balance to DxSale for fair launch. And then, burned the 50% tokens. Marketing department had to partake in presale. Second, using the DXSale protocol to build trust in the community by auto-locking liquidity for 5 years. Worldly-wise tokenomics and sophisticated design of token functions are being used to reach the all-inclusive favorable outcome of the project. Two words you should never hear from us, "Trust Us". At Wisely Finance you don't have to trust us, because we are openly provided you the keys to any information you need.

WISELY TOKEN FEATURES

Auto Boost & Hyper deflationary

The Auto Boost Protocol is mathematically designed to do variable buybacks that adapt based on volume in order to preserve stability. Auto Boost will vary based on the transactions over the previous 24 hours, and will continue to add based solely on volume. Every time a sale of Wisely Token happens, Auto Boost will purchase back a variable amount. This is a unique function that is more powerful than a typical buyback system.

Funds Are Safe

Initial Liquidity Provided will be locked with SWAP.

Anti-Dump

Sales are limited to less than 0.1 percent of total supply, and a 5% charge is imposed to all sells. We will be able to limit swing trading and break whale control as a result of this.

Anti-Whale

Everyone is expected to make profit but we want profit to be for everyone. WISELY Token is coded in a way that prevents big wallet holders (whales) from trying to manipulate the price in their favor or from dumping the token by selling out.
